My eldest daughter studies a lot on the internet for her classes at the university. For that reason, I searched for a computer for her. I work for the university and I'm not rich. For a month, we went everywhere. On Thursday, we went to the shopping center to get the computer because she needed it for Monday. For me, the programs written by Microsoft are very expensive. Why isn't it possible to get these programs free by way of the computer? At least for students, there are discounts and they can buy them for less than \$200. We bought a laptop.
